

HATFIELD MANUFACTURING, INC.

POLY MILK MIXING VATS

The high-capacity, PolyDome Milk Master mixing tanks are made from impact-resistant polyethylene. The stands for the 50, 80, 120, and 250-gallon are made from steel, with a powder coated finish for durability and corrosion resistance.

Features:

- High-Impact Polyethylene
- Easy to Clean
- Heavy-Duty Drain Hose With Econo Gun for Easy Dispensing
- Large Filler Opening
- Twin 3-Blade, Plastic Mixing Propellers
- Ground Fault Protected Cord
- Conical Bottom for Complete Draining
- Calibrated Volume Indicators for U.S. Gallons
- 1/2 HP Farm Duty, Totally Enclosed Fan-Cooled Motor
- Separate 3/4 HP Stainless Steel Pump for Discharge
- Sturdy Steel Support Stand with Corrosive-Resistant, Baked-on Polyester Powder Coated Finish

The 50, 80, and 120-gallon models come with a separate 3/4 HP stainless steel discharge pump to drain the milk from the tank and fill bottles.

They feature a handy Econo Gun filler handle on the end of the heavy duty plastic hose to control the dispensing of milk.

The 50, 80, and 120-gallon models come standard with a 1/2 HP farm duty, totally enclosed and fan cooled motor for long life. Efficient, twin 3-blade plastic propellers mix milk replacement quickly.
